

Directions for the Twin Bucket Toilet

What to do with Pee?

Pee is mostly sterile and mostly water.

Throw toilet paper in the poo bucket or trash can.
Not in the pee bucket.

Spread your daily pee in an area larger than your shadow. Or you can store it in an extra bucket outside to be sprinkle on land later.

Gardens: Pee contains salts which can harm some plants.

What to do with Poop?

Poop is what makes people sick after disasters.

Line your poo bucket (or your toilet bowl) with **two** plastic bags.

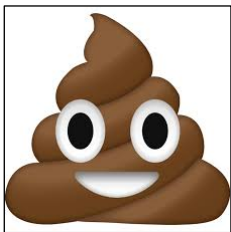

After each use, **sprinkle** the entire surface of the poop with kitty litter, ash, dirt, sawdust, etc.

Once the bag is ~ ½ full, remove both bags, squeeze out the air, and tie them off.

Store poop outside in a **secure** container (garbage can, recycle bin, compost bin, etc.) that will keep out kids/animals. The City will pick it up eventually.

Use Hand Sanitizer!!
