

4 ITEMS YOU ALREADY HAVE THAT HELP IN EMERGENCIES

1

Dental Floss: use it for twine, to hang tarps (or trash bags), fishing line, sewing thread, and so much more. You can even use dental floss to suture a wound if needed.

2

Duct tape: use it to cover shoes to make water-resistant, covering plastic bags in duct tape can turn a bag into a durable tarp. Secure items with it in lieu of rope. You can even braid the tape to make rope!

3

Trashbags: line bags with trash bags for a quick waterproofing of the interior, line tent floors to prevent water from seeping in, create a tarp from a trash bag by applying duct tape over the surface.

4

Community: Sharing resources can be incredibly important during times of stress like an emergency. Use your community for supplies, resources, and emotional support during a disaster.
